

Timer Cover manual

1. **Slide** the cover onto the timer rail.

2. **Optional:** Secure the timer cover to the mounting rail with a cable tie. Align the holes on the mounting rail and the cover, thread the cable tie through both holes, and tighten it inside the cover.

3. **The cover has a slot for an electric fence wire.** We recommend securing the cover to the rail and/or attaching an electric wire to the cover if horses can access the timer and the cover.
